*Home of Miss Sallia Johnson,
where guns were planted to attack*

Chew House

A black and white photograph of a gravel path leading to a stone building with a gabled roof, surrounded by trees and shrubs. The path is flanked by low hedges and various plants. The building in the background has a prominent gable and appears to be made of stone or brick. The scene is set in a garden or park-like area with several trees, some of which are bare, suggesting a cooler season. The overall atmosphere is quiet and historical.
